ariyaan-0 rezaul-hossain-ariyaan rezaul.me

Objective

Passionate about **backend engineering** and **AI-driven intelligent systems**, with hands-on experience building **scalable APIs** and **multi-tenant platforms**. Interested in designing **clean architectures**, solving complex problems, and integrating **AI observability** into large-scale production systems within a collaborative engineering environment.

Experience

Junior Software Engineer

Oct 2025 – Present

Integratr.ai — Remote

- Designed and implemented **scalable RESTful APIs** for a **multi-tenant AI platform (500+ SMEs)** using **FastAPI**, applying **clean architecture** principles and optimizing data workflows — reducing administrative workload by **80%**.
- Engineered **event-driven backend workflows** using **N8N** for real-time **WhatsApp automation** and **payment verification (Stripe/PayNow)**, improving system responsiveness and reducing manual intervention by **10+ hours/week**.

Teaching Assistant

Oct 2023 – Jun 2025

Department of CSE, East West University

- Assisted in teaching **Algorithms, Machine Learning, and Data Mining** to **80+ students** per semester, focusing on problem-solving and conceptual clarity.

Projects

HiveRoom — Hyperlocal Social Platform | hiveroom.online | GitHub

FastAPI, PostgreSQL, SQLAlchemy, Docker, React, CI/CD

- Architected a **production-ready REST API** with **JWT authentication** and **3-layer architecture (Controller–Service–Repository)**, containerized via **Docker** and deployed to a **Hostinger VPS** through a **CI/CD pipeline** (GitHub Actions) with **zero-downtime SSH deployments**.
- Structured the system for **maintainability and scalability**, simulating real-world production backend design.

N8Ventory — Inventory & Order Management System | GitHub

FastAPI, PostgreSQL, PyTest, React

- Applied **Domain-Driven Design (DDD)** and **RESTful API** patterns for **inventory and order lifecycle** management.
- Implemented **PyTest unit coverage** across core business logic to ensure **regression-free deployments** and maintainability.

Education

BSc in Computer Science and Engineering

2020 – 2024

East West University

CGPA: 3.71 / 4.00

Publications

Md Rezaul Hossain, et al. “*Leveraging MFCC Features for Bangla Audio Emotion Classification Using a ResNet-Transformer Encoder Fusion.*” AI & Knowledge Processing '25, Springer Nature

Achievements

- Merit Scholarship** — Awarded for maintaining **CGPA above 3.90** (2022–2023)
- Medha Lalon Scholarship** — Awarded for academic excellence (2020–2021)

Technical Skills

Languages: Python, JavaScript/TypeScript, C++

Web Technologies: FastAPI, Express.js, NodeJS, JWT Authentication, React, NextJS

System Design: RESTful APIs, Multi-tenant Architecture, Layered Architecture, Domain Driven Design

Databases: PostgreSQL, MongoDB, SQLAlchemy, Alembic

DevOps: Docker, CI/CD (GitHub Actions), VPS Deployment (Nginx, Ubuntu), Git
